For Immediate Release:

SCS Introduces Jacket Length Smocks

March 24, 2016 – SCS, Formerly 3M Static Control, has introduced new jacket length smocks with “set-in” style sleeves, reinforced hem, V-neck and stainless steel snaps. SCS smocks are antistatic, low tribocharging, and create a Faraday Cage around the torso and arms of the wearer to protect ESD susceptible items from electrostatic fields generated by charges on the operator’s clothing. Static control garments are intended to attenuate electrostatic fields that may be present on personnel clothing. SCS Smocks meet the requirement for Groundable Static Control Garment System per ANSI/ESD S20.20 required limit of $< 3.5 \times 10^7$ ohm Rtg tested per ANSI/ESD STM2.1 and ESD TR53.

Smocks are constructed of a lightweight dissipative material which is made from texturized polyester and a minimum of 9% carbon nylon monofilament. The conductive nylon fibers are woven in a chain-link design throughout the material, providing continuous and consistent charge dissipation. All of the seams in the smocks maintain electrical continuity from panel to panel and from sleeve to sleeve in accordance with the ESD Association Garment Standard, ESD-STM2.1.

Smocks are available in Blue or Gray colors and sizes XSmall through 6XLarge, [click here](#).

Size	Blue	Gray
XSmall	770010	770020
Small	770011	770021
Medium	770012	770022
Large	770013	770023
XLarge	770014	770024
2XLarge	770015	770025
3XLarge	770016	770026
4XLarge	770017	770027
5XLarge	770018	770028
6XLarge	770019	770029
